## **CEPT Preparation for RSC – 06**

### **Latest results**

This report to the RSPG concentrates on the results reached in ECC WG RRC-06 since the last meeting of the RSPG.

WG RRC-06 at its meeting in Riga, adopted nine European Common Proposals (ECPs), whereas at an earlier meeting in Ljubljana, six ECPs had been adopted. The complete overview of ECPs is shown in the Annex to this note.

Among the latest adopted ECPs is one regarding planning principles that received too many objections at the Ljubljana meeting. This ECP proposes to take into account Other Services (having Primary Status) in planning, but not to take analogue TV into account., noting that analogue TV needs to be protected during transition. This is an important issue because some European countries hoped to achieve a better negotiation position against (some of) their neighbours by requesting to take into account analogue TV.

A major achievement is ECP part 1 regarding the complete text for the Agreement resulting from RRC-06. The agreement proposal plus its technical annexes, contains several hundreds of pages of text. ECP part 1 is in general based on the results of the preparatory work done in the Regulatory/Procedural Group (RPG). However European choices are made regarding the many options contained in the results of the RPG. These choices were based among others on:

- Flexibility in implementation of the agreement
- Possibility to develop broadcasting networks further
- Short duration of the modification procedure
- No unnecessary workload for ITU-BR
- Balance of rights given to the administrations considered to be affected by a modification of the Plan and the rights given to the administrations willing to modify the Plan.

Completely new ideas and approaches are contained in ECP part 5 and part 15 regarding Annex 4 of the Agreement. ECP part 5 deals with the process of identifying administrations that are potentially affected by a proposed Plan modification. ECP part 15 deals with the method to check if assignments converted from an allotment in the Plan or converted from an assignment in the Plan are within limits of the Plan entry.

**RRC-06:**

<b>ECP part no</b>	<b>Subject</b>	<b>RRC-06 document number</b>
1	Texts for the Agreement resulting from RRC-06 and for RRC-06 Resolutions	7, addendum 1
2	Annex 1 to the Agreement: Layout of the Frequency Plans	7, addendum 2
3	Annex 2 to the Agreement: Technical criteria used in the development of the plan and the implementation of the Agreement	7, addendum 3
10	Addendum 1 to Annex 2 to the Agreement Chapter 1: Definitions	7, addendum 10
11	Addendum 2 to Annex 2 to the Agreement Chapter 2: Propagation information	7, addendum 11
12	Addendum 3 to Annex 2 Chapter 3: Technical basis for the terrestrial broadcasting service	7, addendum 12
13	Addendum 4 to Annex 2 Chapter 4: Compatibility with other primary services	7, addendum 13
4	Annex 3 to the Agreement: Basic characteristics to be submitted in application of Article 4 and Article 5 of the Agreement	7, addendum 4
5	Annex 4 to the Agreement, Section I: Limits and methodology for determining when agreement with another administration is required	7, addendum 5
15	Annex 4 to the Agreement, Section II: Check of conformity of a conversion of an allotment into one or more assignments with the corresponding Plan entry of the allotment and check of conformity of the notification of one assignment or one or more assignments which may be part of an SFN with the corresponding Plan entry of the assignment(s)	7, addendum 15
6	Annex 5 to the Agreement: Operation of alternative terrestrial applications within the envelope of a digital entry to the Plan: spectral power density approach	7, addendum 6
7	Annex 6 to the Agreement: Layout of the List <sup>1)</sup> <sup>1)</sup> Assignments to other primary terrestrial services as referred to in § 1.15 of the Agreement	7, addendum 7
8	The planning process	7, addendum 8
9	Transition period	7, addendum 9
14	Planning Principles	7, addendum 14

**RRC-06 EUR:**

<b>ECP part no</b>	<b>Subject</b>	<b>RRC-06 document number</b>
1	Text for the final Acts of the Regional Radiocommunication Conference for the revision of the Stockholm 1961 Agreement.	4, addendum 1
